EXPERIENCE

Software Engineer
Freelance
01/2020 - Present

- Developed a multiple-choice examination application for students to assess their semester performance using React, Express.js, and MongoDB. It was hosted on a local computer.
- Built a website to showcase my works and experiences as a software engineer using HTML, CSS, and JavaScript
- Developed a web application (PASSCO App) that enables high school students preparing for their WASSCE in Ghana to solve past multiple-choice questions for free using Ruby on Rails for the back end and React/Redux for the front end.

Student Mentor
Microverse
03/2022 - 09/2022

- Mentored 3 web developer students, providing technical support through code reviews and bug fixes.
- Provided advice and tips on how to remain motivated to maintain longevity in the program to 3 other students.

Information Technology Tutor
Bosome Senior High Technical School
01/2019 - 01/2022

- Led a workshop to introduce the Student Information System application to all teachers in the school.
- Registered all final year students of the school in the final examination (WASSCE) taking their photographs and recording their details in the WAEC portal.

EDUCATION

Full-stack Web Development (Remote)
Microverse
2022
